

# Streetlight Consent Form

The following residents consent to the installation of a streetlight at the location identified below. The light identifier can be found at [http://www.mountainneighborhood.com/streetlight\\_survey\\_results](http://www.mountainneighborhood.com/streetlight_survey_results) by clicking on an individual streetlight. The popup message will provide an identifier (such as S53) that uniquely identifies a light in the neighborhood. The popup will also indicate neighboring lots which are associated with this light, based on proximity to the light. Residents may request adjustments to this list by contacting Stephanie Methven at [stephanie@methven.us](mailto:stephanie@methven.us) or 219-1691.

Each affected lot owner should clearly print their name and address, indicate their approval or rejection of the light, and sign where designated. A majority of neighbors must approve the light for it to be installed. For those lights that we do not receive a consent form, it will be assumed to stay as the status quo, or against the installation of the light.
